

HOW TO MEASURE YOUR KITCHEN

777 FLOORING & CABINET | (626) 413-6666

Draw your kitchen from above. Use inches and measure each full wall first.

1 Use inches	2 Measure full walls	3 Mark openings	4 Record ceiling height
--------------	----------------------	-----------------	-------------------------

U-Shaped Measurement Example

Example only - not drawn to scale. Measure finished wall surface to finished wall surface.

Before You Send Your Measurements

Walls and openings

Label every wall total, all windows and doors, and the distance from each opening to the nearest corner. Include window width, height and height from floor to sill.

Appliances and utilities

Provide actual appliance widths, depths and heights or model numbers. Mark refrigerator, dishwasher, range or cooktop, sink, plumbing, gas, outlets and vent locations.

Island, peninsula and ceiling

Tell us if you want an island or peninsula. Add its dimensions and walkway clearances. Record ceiling height and any soffits, beams, columns, slopes or other obstructions.

Colors and extra items

Complete the selection form with cabinet colors, countertop and handle preferences. Note crown molding, refrigerator panels, sink and faucet models, and any other items.
